

XM Satellite Radio delivers to me traffic and weather information on my schedule rather than on theirs. It makes for a faster, safer commute preserving gasoline. If regular over the air radio provided the same quality of service I would not have been compelled to subscribe to XM Radio. Just as I can't imagine watching television without cable, I now can't imagine driving without my XM Radio. With it my family is safer. The FCC and Congress needs to stay focused on important issues and leave XM radio alone. I choose to subscribe to XM Radio and no profit driven lobbyist should be able to take away any part of this great service.
